

_fehr Training

The best way to improve workplace safety and ensure efficient warehouse logistics

fehr

___We make your team a key factor for success – with our customized training programs, which provide practical knowledge and enable your personnel to operate systems safely and efficiently. The result: increased performance, less downtime, and a strong operation.

Operator training

- Installation of the system elements
- Introduction to the safety concept and the safety circuit of the SRM
- Operation of the peripherals
- Operation of SRM (including sensor setup)
- Troubleshooting of peripherals and SRM
- Restarting after a power outage

Maintenance training

- Installation of the system elements
- Troubleshooting on peripherals and SRM
- “Weekly IH Check” of the plant
- Maintenance between Fehr services
- Independent implementation of minor repairs
- Check important SRM inspection points, e.g., cassette oil and felt inspection

Good to know

- The training content can be customized to the needs of your team
- Daily flat rate of EUR 2,500 including travel expenses and hotel
- Small groups (up to 5 participants) for maximum learning effectiveness
- 1-day training course, extendable on request
- Certificate of completion for all participants

Get the most out of your team—and the maximum out of your intralogistic processes. We customize the content to your individual wishes and requirements so that your training is precisely tailored to your team. Contact us today—we will be happy to advise you!
